Excerpt: .only 80 per cent of this child mortality as being due to preventable diseases. These preventable diseases prove to be not diseases at all, but merely disorders of digestion. The patient would generally recover in twentyfour to forty-eight hours if the one or two errors of diet were corrected. Not all the victims of these digestive disorders die. To make a conservative guess, I should say that the number of new cases of illness each month is at least three times the number of deaths. The former in California would be 480. We may say there are 500 new cases every month of children under five years of age who get sick from these functional disorders; 160 die, some recover; a very large percentage do not recover, but continue to have trouble with stomach or bowel, with resulting defects of development of body and mind in many cases. Many men and women will admit having had trouble of this kind ever since they can remember. So prevalent are these disorders that the well man or woman seems to be the exception, and we are often reminded that we are a nation of dyspeptics. They are not much better off in any other enlightened country where child life is influenced by the false light of unscientific and erroneous medical learning to the disparagement of experience and the natural, inherited, inerrant, maternal knowledge of mothers. At the bottom of the trouble is the artificial element in...
