

Topology Optimization of Structures and Composite Continua

Filesize: 7.84 MB

Reviews

*The ideal publication i possibly go through. It is amongst the most awesome publication we have study. I am just easily will get a satisfaction of studying a published publication.
(Shanie Cartwright)*

TOPOLOGY OPTIMIZATION OF STRUCTURES AND COMPOSITE CONTINUA

Springer Jan 2001, 2001. Buch. Book Condition: Neu. 235x155x28 mm. This item is printed on demand - Print on Demand Neuware - Topology optimization of structures and composite materials is a new and rapidly expanding field of mechanics which now plays an ever-increasing role in most branches of technology, such as aerospace, mechanical, structural, civil and materials engineering, with important implications for energy production as well as building and environmental sciences. It is a truly 'high-tech' field which requires advanced computer facilities and computational methods, whilst involving unusual theoretical considerations in pure mathematics. Topology optimization deals with some of the most difficult problems of mechanical sciences, but it is also of considerable practical interest because it can achieve much greater savings than conventional (sizing or shape) optimization. Extensive research into topology optimization is being carried out in most of the developed countries of the world. The workshop addressed the state of the art of the field, bringing together researchers from a diversity of backgrounds (mathematicians, information scientists, aerospace, automotive, mechanical, structural and civil engineers) to span the full breadth and depth of the field and to outline future developments in research and avenues of cooperation between NATO and Partner countries. The program covered - theoretical (mathematical) developments, - computer algorithms, software development and computational difficulties, and - practical applications in various fields of technology. A novel feature of the workshop was that, in addition to shorter discussions after each lecture, a 30 minutes panel discussion took place in each session, which made this ARW highly interactive and more informal. 416 pp. Englisch.
