Any single thing, as a pencil, a cent, a boy, may be taken as a unit. 3. Quantity. A unit, or a group of units, is called a quantity; concrete, if the kind of unit is named; abstract, if the unit is not named; five apples, ten cents, twelve boys are concrete quantities; five, ten and twelve are abstract. 4. Number shews the size of a quantity by telling how many units it contains: thus in eight apples, six sheep, four dollars, eight, six and four are numbers. 5. Measure. The number of units in a quantity is often called its measure. The same quantity may have different measures according to the unit taken; thus the same quantity of money may be called one dollar, four quarters, one hundred cents. One, four and one hundred are measures. 6. Integers. The common numbers one, two, three, etc., are called integers, or whole numbers. 7. Cardinal and Ordinal. The common numbers, one, two, three, etc., are called cardinal numbers to distinguish them from first, second, third, etc., which mark the order in which any thing is taken, and are called ordinal numbers.
